

OMKAR PRIYADARSAN

Computer Science Engineering Student | Aspiring Software & Data Analytics Intern

+91-8260706370 • omkarpriyadarsan2@email.com • [linkedin.com/in/omkar-priyadarsan](https://www.linkedin.com/in/omkar-priyadarsan) • github.com/omkarpriyadarsan

PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science Engineering undergraduate at GITA Autonomous College, Bhubaneswar (Batch 2024–2028), with a strong passion for software development, data analytics, and artificial intelligence. Holds multiple industry-recognized certifications in Python, MySQL, and Data Analytics. Eager to apply foundational programming knowledge and hands-on project experience in real-world internship environments. Demonstrates a growth mindset, proactive approach to self-learning, and a commitment to delivering value through adaptable, problem-solving-focused contributions.

EDUCATION

B.Tech in Computer Science Engineering

2024 – 2028

GITA Autonomous College, Bhubaneswar, Odisha | Current CGPA: 8.50 / 10.00

Relevant Coursework: Data Structures & Algorithms, C Programming, OOP (Python), DBMS, Web Development, Discrete Mathematics, Design & Analysis of Algorithms

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript

Web Technologies: HTML5, CSS3, JavaScript (ES6+)

Databases: MySQL (Advanced Topics — Meta/Coursera Certified)

Data & Analytics: Python (Pandas, Matplotlib), Microsoft Excel (Pivot Tables, Charts, VLOOKUP)

Tools & Platforms: GitHub, Visual Studio Code, Google Colab, Canva, ChatGPT, GitHub Pages

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Problem Solving, Algorithm Design

Other Skills: Prompt Engineering, Data Visualisation, AI-Assisted Development

CERTIFICATIONS

Python for Data Science, AI & Development

IBM / Coursera — Feb 2026 | [Verify](#)

Covered Python fundamentals, data manipulation with Pandas, NumPy, Matplotlib, and introductory AI/ML concepts.

Advanced MySQL Topics

Meta / Coursera — May 2026 | [Verify](#)

Covered advanced database concepts including stored procedures, triggers, transactions, query optimisation, and window functions.

Deloitte Data Analytics Job Simulation

Deloitte / Forage — May 2026 | [Verify](#)

Completed practical tasks in data analysis and forensic technology; analysed real-world datasets and created visualisations in Microsoft Excel.

Introduction to Microsoft Excel

Coursera / Freedom Learning Group — Jul 2025 | [Verify](#)

Covered Excel fundamentals including formulas, functions, data organisation, pivot tables, and chart creation.

PROJECTS

ALGOREX – Interactive Algorithm Learning Platform

Apr 2026

HTML5 | CSS3 | JavaScript ES6+ | GitHub Pages | https://omkarpriyadarsan.github.io/algorithm_learn/

- Developed a browser-based educational platform visualising 6 fundamental algorithms (Bubble Sort, Merge Sort, 0/1 Knapsack, Fractional Knapsack, N-Queens, Binary Search) with step-by-step animated walkthroughs.

- Implemented interactive controls (play/pause/step/speed), complexity analysis panels, pseudocode highlighting, and Master Theorem derivations for Merge Sort and Binary Search.
- Achieved a Lighthouse performance score of 94/100 (desktop) and verified full compatibility across Chrome, Firefox, Edge, Safari, and Android Chrome.
- Submitted as a 4th-semester mini project under Asst. Prof. Rekhanjali Sahoo, GITA Autonomous College.

AI-Powered Personal Portfolio Website

2025

HTML | CSS | JavaScript | ChatGPT API

- Designed and developed a fully responsive personal portfolio integrating the ChatGPT API for a conversational visitor assistant.
- Implemented mobile-responsive layout with clean UI/UX, improving personal brand visibility online.

Interactive Birthday Surprise Website

2025

HTML | CSS | JavaScript

- Built an animated surprise webpage with countdown timers, music controls, personalised messages, and dynamic visual effects via CSS keyframe animations and JavaScript event listeners.

PRACTICAL EXPERIENCE & SELF-INITIATED LEARNING

Independent Learner & Self-Initiated Developer

2024 – Present

GITA Autonomous College | Personal Projects

- Earned 4 industry-recognised certifications (IBM Python, Meta MySQL, Deloitte Data Analytics, Microsoft Excel) through self-directed learning on Coursera and Forage.
- Completed the Deloitte Data Analytics Job Simulation on Forage, performing hands-on tasks in data interpretation, forensic technology analysis, and business reporting.
- Built and deployed multiple personal web projects on GitHub Pages, applying HTML, CSS, and JavaScript to creative and functional problems.
- Utilised AI development tools (ChatGPT, GitHub Copilot) to accelerate debugging, refine code quality, and explore modern software development best practices.
- Maintained an active GitHub profile (10+ public repositories) reflecting consistent version-control habits and documented project work.

ACHIEVEMENTS & ACTIVITIES

- Earned 4 certifications from IBM, Meta, Deloitte, and Coursera within the first two years of B.Tech, demonstrating proactive initiative beyond academic requirements.
- Developed and deployed ALGOREX, an educational algorithm platform accepted as a B.Tech mini project and publicly accessible on GitHub Pages.
- Active self-learner in AI-assisted development, integrating prompt engineering and LLM tools into personal and academic projects.
- Consistent participant in online learning platforms (Coursera, Forage) focused on software development and data analytics.
- Demonstrated creativity in UI/UX design through personal website projects, combining aesthetics with functional front-end skills.

CORE COMPETENCIES & SOFT SKILLS

Communication • Teamwork & Collaboration • Adaptability • Fast Learning • Creative Problem Solving • Analytical Thinking • Attention to Detail • Time Management
